

## Introducing The ShortWaveLight™ Purifier

### The World's First Solid-State Far-UVC Surface & Air Purifier

Far-UVC disinfecting light has been shown to effectively inactivate viruses, microbes, and other pathogens. And soon you will be able to disinfect your workspace and personal air space with the world's first far-UVC surface-and-air purifier—the ShortWaveLight™ Purifier from NS Nanotech.

Powered by our patented ShortWaveLight™ Emitter, the world's first solid-state semiconductor to emit far-UVC disinfecting light, the purifier sits on your tabletop or anywhere else you can plug it in.
